

KRISTIYAN BONEV

CLOUD OPERATIONS ANALYST AND AI RED TEAM ENGINEER

k.bonev1993@gmail.com | https://kbonev1993.github.io | +359899527309 | Ruse, Bulgaria

PROFESSIONAL SUMMARY

I bring hands-on experience in software and application support, on-premises infrastructure and cloud services, including Google Cloud Platform (GCP) and Amazon Web Services (AWS). My work combines IT operations with automation through pipelines and AI agents to support reliable systems and more efficient processes. Alongside this, I provide AI red-teaming services as an independent contractor, assessing AI security and resilience.

PROFESSIONAL EXPERIENCE

Red Team Engineer Jul 2026 - Present

Gray Swan AI

- Independent contractor providing AI red-teaming services for private engagements.
- Active Gray Swan Arena competitor with multiple **top-50 rankings**; personal best: **10th place**.

SW/APP/Cloud Operations Analyst Oct 2024 - Present

Accenture

- Support production applications and cloud services on GCP, working with Datastore, Cloud Run, Cloud Functions, App Engine and BigQuery.
- Use Logs Explorer and observability tools to investigate incidents, analyse service behaviour and support root cause analysis (RCA).
- Participate in deployments and perform pre-deployment and post-deployment checks to verify application and service health.
- Built an investigation-on-demand bot on an internal platform, connected to team playbooks and Confluence, to support incident investigations and root cause analysis.
- Develop Python scripts to automate recurring operational tasks.

SW/AP/Cloud Tech Support Engineer Nov 2022 - Oct 2024

Accenture

- Built a security data ingestion pipeline with Apache NiFi to retrieve raw Windows logs from an S3 bucket, convert them to JSON and send them to ELK Stack.
- Ran Apache NiFi and ELK Stack in Docker containers and created a Kibana dashboard to visualise security logs.
- Retrieved and analysed logs over SSH and SFTP; worked with databases, ELK Stack and New Relic for application support.
- Deployed applications to the System Integration Testing (SIT) environment through Jenkins.
- Worked with core AWS services, including EC2, S3 and CloudWatch, for routine operational support.
- Resolved order issues using HTTP POST requests in Postman.
- Prepared order data reports from Power BI visualisations and delivered them as files to management.

TECHNICAL SKILLS

Cloud and Containers: Google Cloud Platform (GCP), Amazon Web Services (AWS), Docker

Automation and delivery: Python, JavaScript, Jenkins, Terraform, Ansible.

Observability and Data: Logs Explorer, ELK Stack (Elasticsearch, Logstash, Kibana), Apache NiFi, New Relic, BigQuery, Microsoft SQL Server (MS SQL), MongoDB, Power BI.

Security: Burp Suite, Wireshark, Nmap, Nessus, BloodHound, Metasploit, Snyk, Trivy, Hadolint.

Development tools: Postman, HTML5, CSS3.

CERTIFICATIONS AND TRAINING

Cyber Security and Ethical Hacking | SoftUni Oct 2024 - May 2025

Network and web application security, reconnaissance, Active Directory and exploitation labs.

DevSecOps Learning Path | TryHackMe Jan 2024 - Apr 2024

Secure SDLC, CI/CD security, SAST/DAST, container security and infrastructure as code.

AWS Certified Cloud Practitioner | Amazon Web Services Dec 2023

Junior Penetration Tester Learning Path | TryHackMe Jun 2023 - Sep 2023

Web and network reconnaissance, exploitation, Metasploit and privilege escalation.

Google Cybersecurity Professional Certificate | Google Apr 2023 - Aug 2023

Linux, SQL, Python, SIEM, incident response and security frameworks.

Full-Stack Engineering | SoftUni Apr 2021 - Nov 2022

Python OOP, JavaScript, REST APIs and web application development.
