Ruse, Bulgaria

PROFESSIONAL SUMMARY:

Security-focused Cloud Operations Analyst with strong hands-on experience in **cloud infrastructure, automation, monitoring, and cybersecurity**. Experienced in supporting **enterprise-scale environments**, improving system reliability, automating workflows, and integrating **security best practices** into operational processes. Solid understanding of **CI/CD pipelines, cloud platforms, observability, incident response, vulnerability analysis, and infrastructure as code**, with exposure to both **defensive and offensive security techniques**.

TECHNICAL STACK:

- **Programming & Scripting:** Python, JavaScript, Bash, HTML5, CSS3
 - **Cloud Platforms:** Amazon Web Services (AWS), Google Cloud Platform (GCP)
 - **Infrastructure as Code (IaC) & Automation:** Terraform
 - **DevOps & CI/CD:** Docker, Kubernetes, Jenkins
 - **Monitoring & Security Analytics:** ELK Stack (Elasticsearch, Logstash, Kibana), New Relic
 - **Data Ingestion & Processing:** Apache NiFi
 - **Databases:** MS SQL, MongoDB
 - **Security & Networking Tools:** Burp Suite, Wireshark, Nmap, Nessus, BloodHound, Metasploit, Snyk
 - **Development & API Tools:** Postman
 - **IoT / Lab Platforms:** Raspberry Pi
-

WORK EXPERIENCE:

SW/APP/Cloud Operations Analyst

Accenture | Jun 2023 – Present

- Delivered advanced technical support for **cloud infrastructure, enterprise applications, and software** in high-demand production environments
- Diagnosed and resolved complex system issues, implementing **performance, stability, and reliability improvements**
- Collaborated with global teams to **enforce security best practices**, monitor threats, and improve incident response processes
- Supported **automation initiatives and proactive monitoring strategies**, reducing operational risk and downtime
- Assisted with integration and operation of monitoring, logging, and observability platforms

SW/APP/Cloud Operations Associate 2023

Accenture | Nov 2022 – Jun 2023

- Provided frontline support for enterprise **cloud and application services**, ensuring high availability
- Performed **root cause analysis** to prevent recurring incidents
- Created and maintained **technical documentation and knowledge base articles**
- Supported deployment and integration of **automation and cloud tools** to enhance scalability and security

Systems Support Engineer

SmartCom | Dec 2019 – Nov 2022

- Maintained and repaired **workstations and peripheral devices** across two store locations, ensuring uninterrupted system operations.
- Diagnosed and repaired **hardware issues** in computers, laptops, and mobile devices.
- Resolved **software problems**, including installation and configuration of **operating systems, drivers, and applications**.
- Supported **local networks, printers, and POS systems**.
- Implemented **technical solutions to improve system stability and performance**.
- Assisted in **customer device repairs**, including hardware and software troubleshooting and restoration

EDUCATION & TRAINING:

Cyber Security and Ethical Hacking

SoftUni | Oct 2024 – May 2025

- System & Network Compromising, Compromising Platforms, Reconnaissance Fundamentals
- Wireless hacking, DoS attacks, network & web service exploitation, Nessus scanning
- Active Directory enumeration, exploitation, post-exploitation, Web shells, C2 fundamentals
- Web application hacking (XSS, SQLi, SSRF, IDOR, auth bypass)
- Passive & active reconnaissance, vulnerability identification & system scanning

DevSecOps | Learning Path

TryHackMe | Jan 2024 – Apr 2024

- Secure SDLC & SSDLC principles, integrating security into the software development lifecycle
- CI/CD pipeline security: SAST, DAST, dependency management, and secure build practices
- Container security: Docker, Kubernetes fundamentals, container hardening, vulnerability mitigation

- Infrastructure as Code (IaC) on-prem & cloud: automating deployment and security best practices

AWS Certified Cloud Practitioner 2023

Amazon | Dec 2023 – Dec

- Core AWS services: EC2, S3, RDS, Lambda
- Cloud computing concepts, benefits, and architecture
- Cloud security best practices and shared responsibility model
- Supporting enterprise cloud operations with foundational AWS knowledge

Junior Penetration Tester | Learning Path 2023

TryHackMe | Jun 2023 – Sep

- Web application and network reconnaissance, enumeration, and exploitation
- Practical Metasploit usage, Linux & Windows privilege escalation techniques

Google Cybersecurity Professional Certificate 2023

Google | Apr 2023 – Aug

- Security fundamentals: SIEM, IDS/NIDS, incident response, threat detection, vulnerability management
- Linux system administration, SQL queries, Python automation for security tasks
- Cybersecurity frameworks: MITRE ATT&CK, NIST, hands-on labs, and portfolio projects
- Applied skills in analyzing logs, monitoring events, and performing basic security assessments

Full-Stack Engineering

SoftUni | Apr 2021 – Nov 2022

- Python Advanced & OOP: SOLID principles, testing, design patterns, debugging, modular code
 - JavaScript Advanced & Applications: DOM manipulation, SPA architecture, REST APIs, async programming
 - Frontend fundamentals: HTML5, CSS3, responsive layouts, cross-browser compatibility
-
